## Q & A

### - Why doesn't my watch begins?

- 1.La watch must be connected to the charger for the first time.
- 2.Si the battery in your watch runs out, you should charge it for a while before trying to activate your watch.
- 3.Try activate your watch by holding down the area below the screen.

### - Why my watch does not work " does load successfully?

- 1.Please make sure your charger is 5V / 1A. If the current is too high, the watch would enter automatic state protection.
- 2.Please confirm that the charging cable is securely attached to the charging position on the back cover of your watch.
- 3.If your watch still cannot be charged successfully, please contact our customer service immediately. Please click on Customer Service .

### - Why is there no charging cable in my package that I received?

- 1.Please refer to the user manual and product details page to confirm if the product is charged by USB. If so, please unplug the watch strap, then you will find the charging socket.
- 2.If your watch does not charge USB and you do not receive the charging cable, please contact our customer service right away.

### - How to change the date and time?

Please scan the QR code in the manual to download the application. Then the time and date will be automatically synchronized when the watch is connected to the phone.

### - Can I wear it to swim?

It is not recommended to wear it for swimming, as it is not a professional swimming watch.
